Notes:

Arrived on location at 1330. GPS coordinates to this release are: 47.11025 -103.3858. The pipeline release started on top of the hill and appears to have run down the hill and possibly into a drainage. I tested the water for chlorides and got a non-detect. At the top of the hill the pipeline is exposed. A large gully with dead vegetation is visible from the point of the release all the way to the drainage. Further follow-up is needed on cleanup. Photos can be found in the report folder.
